

To Whom It May Concern:

As a customer who subscribes to XM radio, I am sending this to you so you may note my complete and utter disbelief that HR 4026 is being considered. This is a service that I pay for and do not believe outside influences should be able to dictate the programming they offer. The NAB should consider widening their services instead of trying to control someone else's.

I respectfully request that my opinion be noted and added to the thousand of others you must be getting on this subject,

Christopher Scott Bell
